'Our' politicians want to upgrade Britain's US-dependent nuclear weapons (Trident) - for £100 BILLION. We think that's bad because:

- 1. having nukes makes our world more dangerous,*
- 2. threatening to use nukes is unethical,*
- 3. upgrading Trident is a breach of our treaty obligation to 'negotiate in good faith to abolish nuclear weapons' (NNPT).*

Our message? 'Spend our money on our services, not nukes'
